Skills

Languages
Javascript (ES6), Typescript
HTML, CSS/Sass, SQL

Libraries/Frameworks
React, Redux, Angular 2+,
jQuery, Jest

Dev Tools
Atom, Bitbucket, Git, Jira,
Repl.it, jsfiddle

Design
Sketch, InVision, Pen & Paper

Experience

2017-02-Present — **Software Engineer**
Leantaas

- Unified critical notifications into a real time notification hub eliminating the need for PMs (Product Managers) to switch between email, slack, and the app
- Helped create and implement a style guide that brought a uniform look and feel to the application's UI and helped engineers build new interfaces quickly
- Collaborated with designers and backend engineers to build multiple new analytics dashboards that increased PM productivity and customer satisfaction

Projects

2017-01 — **Readit (React, Redux, Jest, Sass)**
github.com/charleswcho/readit

- Reddit clone with tag filtering
- React components combined with Redux
- Full view logic test coverage with Jest

2016-08 — **Realloc (React, Flux, React Native, Sass)**
github.com/charleswcho/realloc

- Financial tool to help modify your portfolio based on risk profile
- Responsive design utilizing SASS to create module mixins
- Dynamically created input fields by implementing ES6 computed properties
- Ported to mobile using React Native

2016-08 — **Google-Yelp (React, Flux)**
github.com/charleswcho/Google-Yelp

- Inspiration from Yelp but powered by Google Map's API specifically its Geocoder, PlacesService, and Autocomplete functionality.

Education

2016 — **App Academy**
1000 hour web development course. Coursework: Rails, React, TDD, scalability, algorithms, OOP, coding style, single-paged apps

2015 — **Southern Adventist University**
Bachelor of Science in Biochemistry
